MACH TOWER PACKING

MACH Cascade Bio-Media

Overview:

- Excellent for either partial or total trickling filter
- Commonly used as submerged media in growth reactors
- Provides an optimum surface area for biomass growth and great void space for the sloughing to pass.
- Material of Construction is UV stabilized Polypropylene

Nominal Size (in)	7"
Surface Area (ft ² /ft ³)	30
Void Space	95
Weight (lb/ft ³)-PP	2.8

BENEFITS

- Low Installation Cost
- Excellent for BOD reduction or nitrification
- Low minimum wetting rate
150 gpd/ft²
